

# Isaac Doyle

Toronto, Ontario, Canada

647-657-0017 | ipdoyle6@gmail.com | [www.linkedin.com/in/isaacdoyle/](https://www.linkedin.com/in/isaacdoyle/)

## Experience

### EllisDon

May - August 2026

*Data Analyst Intern*

*Mississauga, ON*

- Automated SQL Server reporting workflows, eliminating 8+ hours of manual reporting per week and improving data accuracy and consistency.
- Optimized SQL queries analyzing 100,000+ records to support project and operational decisions.
- Designed interactive Microsoft Power BI dashboards with DAX, tracking 15+ KPIs and giving clients clear visibility into project performance.

## Education

### McMaster University

September 2024 - April 2028

*Bachelor of Engineering in Software Engineering*

*Hamilton, ON*

- Relevant Coursework: Data Structures and Algorithms, Embedded Systems, Digital Logic Design, Object-Oriented Programming, Systems Programming (C).

## Technical Teams

### McMaster Engineering Society

September 2026 - Present

*Event Software Team Member*

*Hamilton, ON*

- Contributing to MacEngage, a TypeScript event management platform for McMaster Engineering Society events, with a React web app, a React Native (Expo) mobile app, and a Fastify API on PostgreSQL.
- Built a passwordless two-step login with McMaster email validation and one-time codes, with separate student and admin sign-in and an admin access request flow.
- Connected the mobile sign-in screen to the Fastify API through a typed oRPC client and TanStack Query, handling loading states and typed server errors.

## Projects

### Leaf-Watch | *React, Python, FastAPI, scikit-learn, Leaflet*

November 2025

- Developed a full-stack web platform that visualizes global deforestation trends on an interactive Leaflet map with geospatial data layers.
- Trained and evaluated scikit-learn machine learning models on historical land-use and climate data to predict deforestation risk, reaching 89% accuracy.
- Built a Python REST API with FastAPI that serves model predictions and environmental impact metrics to the React frontend.
- Engineered data preprocessing pipelines using Pandas and NumPy to clean and structure multi-source datasets for model training and analysis.

### MindTrace | *Node.js, Express, MongoDB, JavaScript*

January 2026

- Designed and deployed a full-stack mental health tracking web app that logs daily mood, energy, stress, and sleep and charts trends over time.
- Implemented JWT-based authentication with bcrypt password hashing to secure user sessions and protect sensitive data.
- Built a REST API with Express.js and modeled user data in MongoDB with Mongoose, supporting CRUD operations on daily entries.

## Technical Skills

**Languages:** Python, TypeScript, JavaScript, SQL, Java, C, C++, Bash.

**Frontend:** React, React Native (Expo), TanStack Query, Leaflet, HTML, CSS.

**Backend:** Node.js, Express, FastAPI, REST APIs, JWT.

**Databases:** PostgreSQL, SQL Server, MongoDB.

**Data and ML:** Power BI, DAX, Pandas, NumPy, scikit-learn.

**Embedded:** ESP32, Arduino, PlatformIO.

**Tools:** Git, GitHub, Linux.
